It's been forty-five nights  
And fifteen moons  
I've been searching  
For a path to you  
But now i call upon my head  
What's in my head  
It tells me everything is dead  
Gotta keep it keep it out  
I'll go alone  
I'll face the day  
With my hands behind my back  
Did you try to test me  
Or was it real  
I should warn you  
I've learned not to feel

So now i call upon my head  
What's in my head  
It tells me everything is dead  
Gotta keep it keep it out  
So my friend i bid you  
A clean farewell  
Until we meet again  
I'll try to keep  
Try to keep you out  
You call me out  
You take your aim  
You fire you fire  
You call me out  
You take your aim  
You fire straight into the sky
