Suddenly your mind is photographic

You know that I,
I'm the last thing you expected
You've seen my smile
Took your heart by surprise
It's like magic
(Suddenly your mind is photographic)
You can see me right by your side

(CHORUS)

Right out of nowhere you put me in the picture
It's lookin like we could belong this way
Right from the moment you put me in the picture
Everyday has been a day
A blue sky kind of beautiful day

You got me, yeah
I'm right there in your pocket
And I hold you close to my heart
Yeah i admit
There's been a little shift in the way I veiw things
Now I see what your true colors really are

(CHORUS)

Every flash of inspiration
Everything has changed inside my world
As I always pictured it could be
Taking my sweet time
Keeping my heart mine
Then you walk my way
And I heard you say
Smile for the camera!

(CHORUS)
