"Shoot The Moon"

Visit "[Shoot The Moon](#)" on MotoLyrics.com

Seems like you're fading
Want to go it alone
Hear me out (Hear me out.)
For one more song

Roll down the window
You can say your peace
Every single word (Every single word.)
Out on the breeze

Hold on
Don't be in a hurry
Things can move so slowly
When you want to fly

Call it up
Keep it real
Let me show you how it feels
Live your life
Every day is something new

See the light
Find yourself
Get your feet up off the ground
Take the hand that you're given,
And shoot the moon

Don't get me wrong now
Theres a battle ahead
Wounded hearts (Wounded hearts.)
Always mend

I know, I can hear you crying
Things just move so slowly
When you want to fly

Call it up
Keep it real
Let me show you how it feels
Live your life
Every day is something new

See the light
Find yourself
Get your feet up off the ground
Take the hand that you're given,
And shoot the moon

Whoa, whoa, whoa
Whoa, whoa, yeah
Whoa, whoa, whoa
yeah, yeah.

More than a million miles
More than the open sky (Open sky.)
Big dreams can take you higher
Don't you stop trying

Call it up
Keep it real
Let me show you how it feels
Live your life
Every day is something new

See the light
Find yourself
Get your feet up off the ground
Take the hand that you're given,
And shoot the moon

Call it up (Call it up.)
Keep it real (Keep it real.)
Let me show you how it feels
Live your life
Every day is something new (Is something, something
new.)

See the light
Find yourself (Find yourself!)
Get your feet up off the ground
Take a hand that you're given, (Oh whoa!)
And shoot the moon

Whoa, whoa, whoa, yeah.
