

Adam And The Ants "Something Girls"

Visit "[Something Girls](#)" on MotoLyrics.com

Every girl is a something girl
Every girl is a something girl
Every girl is a something girl
She's got something, she's got something

Every girl is a something girl
Every girl has a something smile
Every girl is a something girl
For a while, for a while

I had three wishes I know mine
I would not ask the stars to shine
I wouldn't ask for gems or pearls
I'd ask for the something girls

Every girl is a something girl
From the whites of her eyes to the tip of a curl
Every girl sends a something boy
With that something, with that something

When this old world won't treat you right
You're not feeling yourself tonight
Think of someone you can do
Relax and let that something through

Every girl is a something girl
Every girl is a something girl
Every girl is a something girl
She's got something, she's got something

Every girl is a something
She's got, she's got something
Every girl is a something
She's got, she's got something

Every girl is a something
She's got, she's got something
Every girl is a something
She's got, she's got something
