"Conscious Hide!"

Visit "[Conscious Hide!](#)" on MotoLyrics.com

We betrayed the people we fight
No more fear, fear of a conscious hide
Remember the sea which kept us alive
The beggars we see, we see far behind

We will not betray the ways

Come an existence we revive
Revive we see our own life
With the face of conscious hide
Bring us forth the game
We have your fear, your fear in our hands
Ripping your minds away
To intimidate your fear for us is a plan
We have foreseen the end of your life

In our lives we are lost for our ways
For we see for light seers away
The people we see will fade away

Trouble me and you'll see
We have great on our side
For we see for the light fades away
We will be

We are the ones who take away
We are the sight beyond the day
See all your prayers fade away
Burn
A change in fate will come your way
Seeing the truth behind the maze
Daring to see
