Tell me girl what were you thinking?  
Hit me with something that will make this worth my time  
Take it back, take it all back now  
Every promise I made was just another mistake with  
you

Tell the truth if you think that you can take it  
But I know, you wont  
I never felt so all alone  
But when it was safe I turned my back and the blade  
came through

And I can barely breathe  
And I can barely breathe  
And I can barely breathe

Stand on top of the roof top wondering  
Is it good? Yea it's good for jumping  
Take back every word you said  
Cause I can barely breathe  
(and I can barely breathe)

Tell me now can you still taste him?  
Cause you know you'll never wash your hands of this  
Take it back, take it all back now  
Every drunken kiss that landed on his lips from you

Make a move if you think that you can make it  
But I know, you wont  
I never felt so all alone  
But when it was safe I turned my back and the blade  
came through

And I can barely breathe  
And I can barely breathe  
And I can barely breathe

Stand on top of the roof top wondering  
Is it good? Yea it's good for jumping  
Take back every word you said  
Cause I can barely breathe

(and I can barely breathe)

Stand on top of the roof top wondering  
Is it good? Yea it's good for jumping  
Take back every word you said  
Cause I can barely breathe  
(and I can barely breathe)

Hold your tounge  
You know nothing about this  
Don't even get involved

I hope you watch as I'm falling down  
Because you are the reason I'm hitting the ground  
You could be the one that breaks me  
You will be the one that breaks me now

I hope you know that every tear you cried  
Is a memory left from when you watch me die  
You know i'll haunt your dreams  
With all these pieces you stole of me  
Of me

Stand on top of the roof top wondering  
Is it good? Yea it's good for jumping  
Take back every word you said  
Cause I can barely breathe  
(and I can barely breathe)

Stand on top of the roof top wondering  
Is it good? Yea it's good for jumping  
Take back every word you said  
Cause I can barely breathe  
(and I can barely breathe)
