I want you to know, how I feel 'bout you!
And please don't be mad, on me! Because I have to
leave!

You think we're meant to be,
But I know exactly how you feel!

I will never last forever, but I know you'll make it better!
I would never wanna loose you, but I'll just destroy your
future!

I know that you want me so bad, and that just makes
me sad!
Think of me, when you're blue, can't you feel I'm there
with you!

Don't know what to, or if I'm gonna make it through!

I will never last forever, but I know you'll make it better!
I would never wanna loose you, but I'll just destroy your
future!
I just wanna be right with you, and I know I'm gonna
miss you!
I just hope you're gonna make it, and when you're old
you're gonna thank me!

And I know that you want me to stay!

I will never last forever, but I know you'll make it better!
I would never wanna loose you, but I'll just destroy your
future!
I just wanna be right with you, and I know I'm gonna
miss you!
I just hope you're gonna make it, and when you're old
you're gonna thank me!
