(Chorus)

Despite the fact that there are 1000 people crowded in  
one room  
Despite the fact that there are 1000 fists flying through  
the air  
I've never felt more safe

And even though  
It was the hardest guitar riff I've ever heard  
The hardest bass line I've ever heard  
The hardest drum beat I've ever fucking heard  
I've never felt more safe

But it was the words that they were saying  
It was the sound of their voice  
That drew me in closer and closer and closer  
To the point where I could never leave

But now it's our turn

Now it's our turn

Now it's our turn  
To tell you everything we have to say  
We will never pass this moment up

So sit down  
Shut the fuck up  
And just listen

And if you choose not to listen  
It just means we have to scream louder

(Paper slice  
Wrist choke  
Light from the page  
This is digital suicide)  
Yeah

We will never pass this moment up  
We will never let a little bit of this go by  
Cause we stood in that same place

For years of our lives  
Taking the same shit that you fed us

So sit down  
Shut the fuck up  
And listen

I will never let this moment die

We will never pass this up

We will never pass this up  
We stood in the same spot  
Taking the same shit that you had to feed us  
For years of our lives

I will never let this moment die

I will never let this moment die

Ever

Yeah

(I am not your hero)  
I am sorry  
(I am not your saviour)  
I am sorry  
(I am not your scapegoat or your christ)  
I will never speak out of term again  
(I cannot be anything to you)  
I will never speak out of term again  
(I cannot be any more then what I already am)  
I am so sorry  
(Which is nothing at all  
Just a ghost of the machine)  
I will never speak out of term again
