(Verse 1)

Living in this world can often make you feel like hell  
With Bosnia and Libya and Kosovo, as well  
Outside the USA are wars with guns, and bombings,  
too  
In our own peace-torn nation, whatever can we do?

(Chorus)

We're all gonna go play paintball, it's gonna be such  
fun  
A bunch of guys in camouflage happily bearing guns  
There's nothing I like more than picking friends off one  
by one  
We're all gonna go play paintball, it's gonna be such  
fun

(Verse 2)

There's nothing like this power, I've got it in my hands  
With this here rifle helping me to feel just like a man  
My fellow human targets have each other in their sights  
'Cause violence and weaponry are basic human rights

(Verse 3)

No, we don't use bullets, we use the next best thing  
Little balls of paint that never kill, they only sting  
This here's the kind of game that friends and family  
love to share  
'Cause they know when a real war comes they're gonna  
be prepared

(Verse 4)

I know that there are people who are feeling kind of  
sore  
Pacifists who think that you should never play at war  
They tell us we're impossible, they tell us we're insane  
We don our masks and ammo and say, "Hey, it's just a  
game!"
