"Down With Love"

Visit "[Down With Love](#)" on MotoLyrics.com

Take it all in Let it all out Can you help me? Can you tell
me why? What made my heart sink Now makes her
cry Drown my sorrows with another wine But it won't
work this time However hard I try I've gotta pick myself
up off the floor Kick these feelings out of the door I take
it all in I let it all out My world's in a spin Some things you
gotta shout about Cause when you're down with
love There's nothing you can do What you want Try as
you might So hard to fight Somethings you can't live
without And when you're down with love There ain't no
cure at all Jaded heart I've lost my appetite And I can't
see An end in sight Oh won't you bring back blue
skys Baby hold me tight If you're not here with me You
know I dread the night I've gotta pick myself up off the
floor Kick these feelings out of the door I take it all in I let
it all out My world's in a spin Some things you gotta
shout about Cause when you're down with love There's
nothing you can do What you want Try as you might So
hard to fight Somethings you can't live without And
when you're down with love There ain't no cure at all I'll
never love again If this is how it ends And I don't wanna
be down, down, down, down, down Down with love Down
with love Down with love I take it all in I let it all out My
world's in a spin Some things you gotta shout
about Cause when you're down with love There's
nothing you can do What you want Try as you might So
hard to fight Somethings you can't live without And
when you're down with love There ain't no down When
you're down with love There ain't no cure at all
