[Verse 1:]

Lately girl I started noticing a change,
The way that you talk to me ain't the same,
Tell me exactly what is going through your brain,
Cause the vibe that I get from you is pain,
And that's when you said that you had other plans,
And you didn't include me, no
You just left it at that didn't think nothing bout what,
You was doing to me, yeah
"that's when I feel"
I felt another heartbreak
"that's when I feel"
I felt I made the same mistake
"that's when I feel"
That I should get mentally and physically over you
before you break the news,

[Chorus:]

"before the breakup"
I started taking pictures of the walls,
"before the breakup"
I started deleting all of your calls,
"before the breakup"
I started to mentally get physically over you before you
break the news,
"before the breakup"
I started going places without you,
"before the breakup"
I started to think more less of you,
"before the break up"
I started to mentally get physically over you before you
break the news,
"before the breakup"

[Verse 2:]

One week done passed on by,
You finally called me to say what's on your mind,
You telling me you seeing another guy,
But to your surprise I didn't trip this time,
Cause I realize that I'm over you,
And I'll admit that it feels good,
Now you tripping out you don't quite understand,

So that's when I told you,

[Chorus:]

"before the breakup"

I took all of the pictures of the walls,

"before the breakup"

I started deleting all of your calls,

"before the breakup"

I started to mentally get physically over you before you
broke the news,

"before the breakup"

I started going places without you,

"before the breakup"

I started to think more less of you,

"before the break up"

I started to mentally get physically over you before you
broke the news,

"before the breakup"

[Bridge:]

Don't you think I'm a feel it's the end of the road for
me,

I still got my life to live,

Trully I do beleive that I made the right decision to
move on,

I never knew that I could feel so much freedom,

It feels like that I can spread my wings and fly,

And when my friends start to ask how,

I got over you,

And that's when I say,

[Chorus:]

"before the breakup"

I started taking pictures of the walls,

"before the breakup"

I started deleting every call,

"before the breakup"

I started to mentally get physically over her before she
broke the news,

"before the breakup"

I started going places without her,

"before the breakup"

I started to think more less of her,

"before the break up"

I started to mentally get physically over her before she
broke the news,

"before the breakup"
