"16"

So here we are
Under a moon
And a sky full of stars
But I'm looking at you
We are forever
One perfect kiss
That makes us immortal
For a second that is

16 for good
16 forever

I hear you whisper
Soft and unreal
What if this was our last night
How would that make you feel
I'll never find time
To return what you give
So it's a good day to die
Even better to live

16 for good
16 forever

So here we are
Raising a glass
The moon casting shadows
onto the grass
We are forever
We are that light
We are immortal
We are tonight

16 for good
16 forever
