I'm on the run for my life  
It's seems that everything that you said was right  
Has come undone, lost my sight  
But have you ever thought you've done your best

When you were under the gun, that's right  
I know. I've seen this place before  
But it's never been so fun  
Never been so fun

I've been on the run, this shadow weighs a ton  
It's starting to make sense to me  
I can't really make you love me  
No, no, you know I can't really make you love me, no,  
no

I've been on the run, my shadow weighs a ton  
I know I found the recipe for me  
But I can't really make you love me  
No, no, you know I can't really make you love me, no,  
no

You know I'm haunted on overseas  
Haunted on each coast  
Play them like Ebaneeza  
I made them see the ghost

Back from the future donned in Japanese kimonos  
Even though the streets show love, try to see me grow  
I often see me floatin', but my shadow it weighs a ton  
Call it baggage, I use it all to advantage

But I can't make you love me  
This time it's on you  
And you can't try to deny, these words when they're  
true  
I'm on the run

I've been on the run, this shadow weighs a ton  
It's starting to make sense to me  
I can't really make you love me  
No, no, you know I can't really make you love me, no,

no

I've been on the run, my shadow weighs a ton  
I know I found the recipe for me  
But I can't really make you love me  
No, no, you know I can't really make you love me

Oh no, ay yo, cud get to steppin'  
Your tongue is like a weapon  
This is cappin' from heaven and yet so are ye's

Since the age of seventeen  
I've been taking apart microphones  
You've been taking apart men you've blown  
With glowing skeleton bones

In the closet, animals strike curious poses  
They feel the heat between us  
But you need a woman's glorious style on diamond to  
fetus  
Carry my penis, I'm like the man in the moon  
When we kissed then you soon on the run

I've been on the run, this shadow weighs a ton  
It's starting to make sense to me  
I can't really make you love me  
No, no, you know I can't really make you love me, no,  
no

I've been on the run, my shadow weighs a ton  
I know I found the recipe for me  
But I can't really make you love me  
No, no, you know I can't really make you love me, no,  
no

I can't really make you love me  
I can't really make you love me  
I can't really make you love me  
I can't really make you love me
