Looking through a window above, just like a story of  
love  
Can you hear me  
Came back only yesterday, moving farther away  
Want you near me  
All I need was the love you gave, all I needed for  
another day  
And all I ever knew, only you  
This is going to take a long time  
And I wonder what's mine  
Can't take no more  
Wonder if you'll understand just the touch of your hand  
I am closed off  
All I need was the love you gave, all I needed for  
another day  
And all I ever knew, only you  
And all I ever knew, only you
