ey ey ey ey,  
gal yah whole time just stuck on ma mine,  
thinkin about last time i work out ya spine,  
sweety i know that im hard to find,  
a next one like you in all of my life girl,  
so giv me 2 shots to my heart,  
if i aint with you livings too hard,  
girl i got the script come and play your part,  
i fell off the edge girl come and save me,

baby i know the choice to leave was on me,  
but right now this glass is empty and my mind is losing  
sleep,  
without yah,  
maybe by chance ill catch some dreams where your  
there next to me,  
so i can hold yuh, hold yuh,

every minute of every single hour,  
i vision life before i was without her,  
im singing these notes so i can tell yah baby dont slip  
away,  
slip away,

every minute of every single hour,  
i think back on that day when i first found her,  
im singing these notes so i can tell yah baby dont slip  
away,  
slip away,

it aint easy,  
going through my days wishing i could hear your voice,  
believe me,  
going half crazy is something i,  
try to avoid,  
but it aint working shorty,  
you hav got something for me,  
so many miles id run,  
to see your eyes shine like the set sun,

baby i know the choice to leave was on me,  
but im about to send a text and tell you that im losing

sleep,  
without yah,  
but maybe by chance ill catch some z's when your there  
next to me,  
so i can hold yuh, hold yuh,

every minute of every single hour,  
i vision life before i was without her,  
im singing these notes so i can tell yah baby dont slip  
away,  
slip away,

every minute of every single hour,  
i think back on that day when i first found her,  
im singing these notes so i can tell yah baby dont slip  
away,  
slip away,

dont slip through my fingers,  
dont slip through my fingers,  
dont slip through my fingers,  
dont slip away,  
dont slip through my fingers,  
dont slip through my fingers,  
dont slip through my fingers,  
dont slip away,
