"People Need Light"

People need light to get down the stair
People need light while brushing their hairs
People need light to get to the toilet
People need light, people need light
If there was no light, where would we go?
If there was no light we'd have to go very slow

People need light to get out this place
People need light to check their face
People need light while getting their do's done
People need light, people need light
If there was no light, how would we see?
If there was no light, how would you tell it was me?

If there was no light where would we go?
If there was no light we would have to go very slow
