Ease In To Me

You have my confidence

Leaning on every thing you say

I try I try so hard to become everything you are

They say it's for the better, the memories

They say it can last, well yes it can

So Ease into me, but stick around

Well, keep me warm, you're mine

You don't have to pull to make me fall

Because I'd come down for you on my own

It takes so many tries to free a soul

But only one love can make you whole

And it's so high, you're so high, but it's so true

I'm-a-gonna have to let the wind carry you, carry you.

They say it's for the better, the memories

(It could happen this time)

They say it can last, well yes it can

(As long as we play it right)

So Ease into me, but stick around

Well, keep me warm, you're mine

You don't have to pull to make me fall

Because I'd fall down for you on my own
