Yes you knew you gonna pass by
You're written down the songs they gonna play when
you die
Such a feeling to live with I can't imagine that in my
worst dream
So many nights you must've been awake
Thinking of your family and how they will take it
All your last time must've been like hell
but you don't wanna make us sad and tell

All she say - give love in every way
All I want is for her to see oh, I know she believes in me

Everything comes again, I'm sitting here today like you
did then
I say the same words to my son like you said to me
when I was young
I pray that you could see I child, so little mm...charming
and wild
I have told him who you were,
yeah so full of love but now you're up above

All she say - give love in every way
All I want is for her to see oh, I know she believes in me

All she say - give love in every way
All I want is for her to see oh, I know she believes in me
