Music: A.Kokko, lyrics: P.Kokko

With outspread wings eyes wide open glides osprey  
Wounded by a gun never fired - humanity  
Twisted form genotype inside - lethal disease  
>From generation to others will occur

World in its forms is dying  
Polymorphism is ruined  
Or ...?

Are these changes in system meant to be done ?

How fast will proceed this process that slowly begun ?

Into the night we disappear - before the end  
Silence will creep over the planet - final era  
Component parts of life remains - combination  
And under control of creator the new race will born
