Can you see
How you're hurting me?
Fast asleep
My subconscious weeps
In the growl
Of your hatred now
Feel the sound
Move around

Deep within your evolution
Coercion creates the diversion
And I can't believe your version of events
We must find a peaceful solution

Here tonight
Are the northern lights
Underneath
Your space age feast
Who can say
If we'll be OK?
In you r growl
Watch me now

We divide
No compromise
A new addition
To you fruition
And I still say
That there's no way
To turn it around
To turn it around
