What have you done for us  
But bring the breakdown of all we knew?  
Manipulated everyone with the lie  
How much more of this  
Can we take before we lose everything?  
How can we bring you down?

There in all his glory  
Our false prophet leads the way  
And I fear there is no way to stop the fire  
From burning

Sent your boys to war  
With no real reasons why  
Lining your pockets while thousands die  
I am sure that you aren't getting any sleep  
You just lie there with blood on your hands

Hear me when I say  
You won't get away with this  
You won't get away with this
