Pump up the demon iÂ'm inhaling my virtue  
viewer discretion the intent is to groove you  
ride the wavelength shake the foundation  
total chaos makes pain recreation  
point the weapon in any direction  
blood pounding circuits acceleration  
can you taste it  
can you touch it  
do you need it  
do you feel it  
drive  
can you taste it  
can you touch it  
do you need it  
do you feel it  
drive  
push out the power break out the hardware  
convert the madness wonÂ't you take us there  
smoke the rhythm overloading the freak show  
neurotic city slip siding the psycho
