Hey, hey
O-oh, o-oh

I love New York in wintertime
I pray for it in June
I'm always in that state of mind
When snowflakes starts to bloom

Footprints on the sidewalk
Goin' east and on, forward to
Could they be from you?
Could they be from you?

I want to take this moment here
And freeze it in my hands
So when I'm feelin' cold sometimes
It's there for me to have
I want to be this happy
For as long as I can
With you I know I am
With you I know I am

Cause everytime I'm missing
Everyone I love
That's me forgetting
How much is enough
And maybe this December
I won't feel so blue
If I just remember
Everything I have with you
With you, with you
With you, with you, with you

Underneath the mistletoe
We're standing on the moon
And looking in your starry eyes
Is when I see the truth
From all the ones I lost
I'm holdin' on to you
I hope you feel it too
I hope you feel it too

Cause everytime I'm missing
Everyone I love
That's me forgetting
How much is enough
And maybe this December
I won't feel so blue
If I just remember
Everything I had with you

Cause you can't give me anything
Cause you already given me
Cause you can't give me anything
Cause you already have

Everytime I miss him
And everyone I love
Oh, that's me forgetting
How much is enough
And maybe this December
I won't feel so blue
If I just remember
Everything I had with you

With you, with you
With you

With you, with you
With you
