Oh a happy day

I met a rockstar beau

Took my breathe away

Never though I'd find someone quite like you

Can't believe you're mine

Made all my dreams come true
'Cause he's my sugar baby rockstar

Plays our love song on the guitar

He rock and rolls it like the devil

And kisses me like heavy metal
My rockstar beau

Rocks it all night long

After every show

He comes and turns me on

My rockstar baby

You complete my soul

Promise you'll never leave me

I love your

Rock n Roll, Rock n Roll
Oh a happy day

I think I fell in love

The way he moves on stage

I just can't get enough

And I know my heart will stay safe with you

We won't ever part until bodies move
'Cause he's my sugar baby rockstar

Plays our love song on the guitar
My rock star beau

Rocks it all night long

After every show

He comes and turns me on

My rockstar baby

You complete my soul

Promise you'll never leave me

I love your

Rock n Roll, Rock n Roll
Oh a happy day

I think I fell in love

The way he moves on stage

I just can't get enough
My rock star beau

Rocks it all night long

After every show

He comes and turns me on

My rock star baby

You complete my soul

Promise you'll never leave me

I love your

Rock n Roll, Rock n Roll
