I heard they built a road out in the desert  
That goes on and on for miles and miles  
Its down hill all the way  
So you never have to pump the gas  
You just sit back and relax  
Too hard for the cops  
Just right for beginners

I heard they built a road out in the desert  
And no matter how long you drive  
You never meet square one  
There's only one station on the radio  
And all they play is old rock and roll  
Alright, watch the weather, lets just cruise

You can drive for days without seeing another face  
And in no time  
Won't tell your home from any other place.

Driving down this road out in this desert  
Saw a big black cloud full of lighting  
Bad weather  
No place to stop, no place to go  
Got to keep on moving  
As the rain turned to snow  
Down that road forever

What's behind that hill?  
Looks like the sea  
The only that kills  
Is the sinner inside of me  
I'm just a set of wheels  
In this open space  
Forgotten how it feels  
To lie in bed for days

Driving down this road in the desert  
Saw a big black cloud full of lighting  
Bad weather (x3)
