Visit "[Half Empty](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Sometimes I know my attitude can be a little much  
Sometimes I [?] And I just gotta fuss  
Sometimes I'm HOT, really HOT, then I'm freezin cold  
Yet you still take me in your arms and I just let it go

Never for a...  
Second baby  
Should you ever feel like you're in this alone  
So don't you worry  
Cuz I got you  
Your heart is in my hands and I'm not lettin go

You already know  
What I say is true  
You already know  
My heart beats for you  
You already know  
That no one in this world can take me from you  
You already know  
You cant deny  
You already know  
it's written in the sky  
you already know...  
without you in my life I'm half empty  
My..heart...my heart  
I'm half empty  
My..heart...my heart

They say you don't know what you got until it's up n  
gone  
But ima skip that chapter, turn the page, keep holdin on  
Cuz I know what I got, n what I got is worth more than  
platinum gold  
N i keep on tellin you just like a broken record (OH!)

Never for a...  
Second baby  
Should you ever feel like you're in this alone  
So don't you worry  
Cuz I got you  
Your heart is in my hands and I'm not lettin go

You already know  
What I say is true  
You already know  
My heart beats for you  
You already know  
That no one in this world can take me from you  
You already know  
You cant deny  
You already know  
it's written in the sky  
you already know...  
without you in my life I'm half empty

I know it's(I know it's)...impossible (impossible)  
For you to read my mind  
But my heart is an open book (my heart is an open  
book)  
All you gotta do is look inside  
And my love you'll find

You already know  
What I say is true  
You already know  
My heart beats for you  
You already know  
That no one in this world can take me from you  
You already know  
You cant deny  
You already know  
it's written in the sky  
you already know...  
without you in my life I'm half empty  
My..heart...my heart  
I'm half empty  
My..heart...my heart
