[VERSE 1:]

Never thought I'd feel this way  
Got rid of all my pain  
Got it back together from the way back when  
You were the one I had on my mind  
Don't take it personal, no  
Was time to let you go  
According to what I heard  
It's better to stay away then (but then)  
Soon as I saw your face  
I swore I'd feel the same  
Memories came rushing all over me  
But I don't wanna make anymore  
Sorry if the thrill is gone for me  
It's too bad because we were a masterpiece.

[HOOK:]

Now all that's left of us is  
Just another melody  
Just another song I sing  
Can't believe you're just  
Music on my radio  
Not in love with you no more  
I'm over you  
We used to be a symphony  
You used to be my everything now you're just  
Just another melody

[VERSE 2:]

Gotta say you had me going  
I saw you as the only one to cry  
So many nights alone, and I  
Was really down boy,  
Had me hypnotized boy  
Now you're just an after thought  
Don't care if you call or not (No)  
Matter fact don't call at all no  
(Don't deserve this groove)  
Sorry if the thrill is gone for me,  
It's too bad because we were a masterpiece.  
Now all that's left of us is

[HOOK:]

Just another melody  
Just another song I sing  
Can't believe you're just  
Music on my radio  
Not in love with you no more  
I'm over you  
We used to be a symphony  
Used to be my everything now you're just  
Just another melody

[BRIDGE:]

Every note that I'm singing is bring me further away  
Every word that I say  
And every chord that I play  
Reminds me day after day that you're just

[HOOK:]

Just another melody  
Just another song I sing  
Can't believe you're just  
Music on my radio  
Not in love with you no more  
I'm over you  
We used to be a symphony  
You used to be my everything now you're just  
Just another melody

Never I'll be Just Another Melody  
Melody, Baby  
Never thought no
