Love is like the wind,
Sometimes it blows your way,
And until now
It missed me somehow.

But when I turned around
I saw you standing there.
The sound of your voice -
I had no choice.

I used to have a wish
One day I'd feel like this.
Now I know love exists
Cause it's standing right next to me.

Beneath the moon tonight
I see it in your eyes -
No more false starts,
No more broken hearts.

I used to have a wish
One day I'd feel like this.
Now I know love exists
Cause it's standing right next to me.

Even in the dark,
Even when you're gone
I feel you in my heart.

I used to have a wish
One day I'd feel like this.
Now I know love exists
Cause it's standing right next to me

Standing right next to me
