Helicopters dropped us in the bush  
run for cover with an adrenaline rush  
motors crash tearing up the ground  
bodies lay lifeless on the ground

*[Chorus]*

fighting a war we can't win  
government commits the ultimate sin

boys running screaming in fear  
wounded screaming dragged to the rear

here comes the enemy with big guns  
we're the wounded the lucky ones

*[Chorus]*

political sin send you off to die  
can;t ask the government any questions why  
I don't support no government  
that's full of hate and human torment

*[Chorus]*
