So still is the night, that surrounds me...  
Into sweetest dark  
So near is the time, to set me free...  
From the poison light

Here almost end of path, that took me here  
To leave weak past behind, passing to...

Rise... got the time in my hands  
Future's here where I stand  
I... control your destiny  
The one who always be

Sacred place in holy land  
Where black raven flies

Last steps to the gate, where is my fate  
Waiting me to find  
Now I become the guide, lord of the night  
Who make immortals rise

Rise... got the time in hands  
Future's here where I stand  
Rise... control your destiny  
The one who will always be  
I... and the dream in your mind  
The only one you desire  
I... am all your fears  
I decide your final years
