Drifting from the living the skies grow black Truth's now  
bleeding pure blood of the lack  
Beast of possessions licking your blood From burned  
stumps their future's cut Denial of  
freedom, denial of salvation, denial of life for their  
salvation Dominion's been revealed and  
erased all cultural breathing Slavery will take control of  
your chained soul! Of your soul!  
Modern war is not just about a conflict which has to be  
solved. Todays "leading" nations  
use their destructive war machinery to achieve power  
and political influences for future  
economical actions. No matter what the consequences  
are for the freedom and will of the  
people who live in the regions of interest. And reality  
strikes again.
