feat. Shaggy

[Chorus]

When I close my eyes
I feel my heart is always calling for you
Dreams are filled with love
And I feel my heart is always calling for you

When you ...right, know you feeling lonely
I keep a smile on your face when you are lonely
Give me love on my flow until you drown me
Seem across that white the sea sharks are only
Just to get to you, baby girl I promise i
I'm in debt to you, baby you're my ride or die
Never forgetting you, always in my thought tonight
Never letting you go girl, stuck with I and I

Sunny days are not what they used to be
Any minute you're not around
Every memory's filled with thoughts of you and I
My evenings I'm dreaming that you never left my side
So come on over, I want you all alone
I wanna prove to you how much I miss you
And there's nothing you can say
That's gonna push me away
Cause baby I feel

[Chorus]

When I close my eyes
I feel my heart is always calling for you
Dreams are filled with love
And I feel my heart is always calling for you

In my eyes, I'm vision of you right
And it brings me down to my knees
I can't express the feelings to hold behind
I'm picturing us all alone and down by the sea
So come on over, I want you all alone
I wanna prove to you how much I miss you
And there's nothing you can say
That's gonna push me away

Cause baby I feel

[Chorus]

When I close my eyes
I feel my heart is always calling for you
Dreams are filled with love
And I feel my heart is always calling for you

I know you girl would seem like it's a bad connection
Every nights I miss your loving and affection
Close my eyes I need my genie in a reception
Lately, i not can't sleep, Inception
Missing you bad, call love and react
Right down your side, and I'll be right back
Don't know that you're my heart..
You miss the way hold you down
The way I hold you down
So when you're all alone
I know you wishing I came over to top you like a
metronome

[Chorus]

When I close my eyes
I feel my heart is always calling for you
Dreams are filled with love
And I feel my heart is always calling for you.
