Ooh, baby blue
Is it true it's not you that they came for?
I'm a free radical, libertine
Jimmy Dean eat yr heart out

Did no one warn us, no one want us?
They did not warm to us

Ooh, baby blue, the lies ring true
I feel winter's breath in my bones
But I'm a loose cannon whore, knows the score
Shown the door before the night's out

At least you wear yr bruises well
At least you have some tales, something about you
But ooh, baby blue, time plays tricks
You always knew the wise feign injury

Did no one warn us, no one want us?
They did not warm to us
Did no one warn us, no one want us?
They did not warm to us

I could do without lectures so heaven protect us
From these bad vibes you're giving
I could talk with my agent but James Bond, well, he ain't
Oh, these bad vibes you're giving

I could talk with my label but I am not able
Oh, these bad vibes you're giving
This could do with a remix but don't break what's not
fixed
Oh, these bad vibes you're giving

That's all folks, that's all folks
That's all folks, fuck all folks
That's all folks, fuck all folks
That's all folks
275 pounds of nothing
