In a cold breeze at night  
A newborn life's conceived  
Lying in it's cradle  
To expect nothing yet

Devil's child - thy name is black  
Devil's child - your cries diabolical  
Devil's child - rise from the womb  
Devil's child - give'em hell

Hellish child

Look at me now  
Devil's breed  
Veiled in misery  
Ready to rule the world  
With honor, pride and glory

Your penetrating eyes gaze into mine  
They're reflecting the spare moonlight  
Your cries reveal the wars from previous lives  
Little hellspawn grab the night  
There's a whole world inside yourself  
Lay down and look inside yourself

Pick me up  
Take me away  
Give the world  
Your ancient wisdom

Maybe we will all learn  
Draining knowledge from your source  
... from your source!
