I told you the other night
What I wish I'd told you, at a different time
It doesn't make sense, it's not fair

I wish you were gonna be around
Let's smash it, it's selfish
But you don't have to deal with that now

All I can do is be inspired, all I can do is honour your life
Friend, you were my friend
You were my friend, you were my friend
The time I got with you, I'll never forget
I almost crashed my car driving north west
In rainy british sunset

Your hair was mermaid blue
And your skin is perfect
You taught us about love
When the two of you met

Friend, yeah you're my friend
You were my friend, you were my friend
You were my friend, you were my friend
You were my friend, you were my friend

All I can do is be inspired, all I can do is honour your life
All I can do is be inspired, all I can do is honour your life
