

Caterina Valente "Where"

Visit "[Where](#)" on MotoLyrics.com

Where just the rainbow come from
Where just the river start
And the Christ to gleam of a mountain stream
And the love and the love
They are feel in my heart

Where just the hard beach come from
Who really understands
Or the trembling ova
Bout or hard in the ova
And the glow and the glow
When we just can

I have found that old around
They are wonders I can't explain
And our love is just like a mirror call
Like a sun that shine thought the rain

Where just the true love come from
How just this feeling grow
Though I try in vain
Still I can't to explain
But our love, are true love
Is the greatest thing... I know

Where just the true love come from
How just this feeling grow
Though I try in vain
Still I can't to explain
But our love are true love
Is the greatest thing... I know
