When skies are gray  
And the rain may fall  
Somehow through it all  
You're always with me

As time goes by  
And doors may close  
What...I... hold onto - is  
You're always with me

Whether... near or far from me  
You are in my memory  
So it's... my des..tiny, you see  
That you're always with me

What can I say?  
This is ... how it's always been  
Right from day one to eternity  
You're always with me

As time goes by

And doors may close  
What...I... hold onto - is  
You're always with me

What can I say?  
Let the chips fall where they may  
There is no night...as long as  
You're always with me

You are my strength  
Whether near or far from me  
Yes it is ...my des..tiny, you see  
That you're always with me

Yes.... it's true  
You are really a part of me  
There's no sense deny-ing the reality that  
You are always, always, always with me
