Some call it faith, some call it love  
Some call it guidance from above  
You are the reason we found ours  
So thank you, stars

Some people think it's far away  
Some know it's with them everyday  
You are the reason we found ours  
So thank you, stars

There are no winds  
That can blow it away on the air  
When they try to blow it away  
Is when you know it will always be there

To some it's the strength to be apart  
To some it's a feeling in the heart  
And when you're out there on your own  
It's the way back home

There are no winds  
That can blow it away on the air  
When they try to blow it away  
Is when you know it will always be there

Some call it faith, some call it love  
Some call it guidance from above  
You are the reason we found ours  
So thank you, stars

So thank you, stars  
So thank you, stars
