kevin drinks a bottle in the car before the bar  
tammy needs the streets and heat because she'll be a  
star

the only way janice lives is when they look at her  
joey's got the sickness kerry doesn't have the cure

everybody needs something  
their own novacaine  
everybody needs something  
to ease the pain

sarah needs a hearbeat next to her to sleep at night  
carly needs to cut so mom will know she's not alright  
molly fills the hole inside with sugar and with salt  
stuart walks around believing everything's his fault

everybody needs something  
their own novacaine  
everybody needs something  
to ease the pain  
everybody needs something  
to lie so true  
everybody needs something  
oh, well all i need is you

lindsay lost her smile while looking for the low  
genevieve got a nose job from all that blow

everybody needs something  
their own novacaine  
everybody needs something  
to ease the pain  
everybody needs something  
to lie so true  
everybody needs something  
oh, but all i need is you
