My first show was at a dead end bar down on College Street

I was proud to play for nothing back when I was seventeen

I swore my dreams were over when I never played a second gig

Till I found out that the bar shut down for getting rich off of high school kids

A change never comes easy

A change never comes easy

Ten years have come and gone. Slipped out form under me

And now days I play my songs a long way from College Street

Everyday is a brand new place and sometimes I still play for free

It goes to show the good old days ain't as bad as they used to be

A change never comes easy

A change never comes easy

I guess I took it hard as anybody in my shoes

Live and learn hide the scars but don't let it get to you

A change never comes easy

A change never comes easy

A change never comes easy

A change never comes easy
