You are the inspiration in my life
You're the sun the moon and the stars
And there's nothing here to stop me now
Cos I feel just who you are
I don't wanna take this from you
And I not afraid to fall
It's not physical or sexual
It's not anything at all
I just love you
Anyway
Hundred years have closed
In between what was
And what will be
Wrapped up in a cotton blanket
Here I am unmasked for all the world to see
And I feel like
I can can dance again
I can deal with all the hurt
I feel love will last away today
And I left it in the dirt
And I realise that it's not too late
And I'm never hear no more
I think I can make you happy
Cos today our time has come
I just love you
Anyway
It's getting better
It's getting better
It's getting better
It's getting better
It's getting better
It's getting better
Today I can trust again
And I have my faith in you
I can see what you have for me
And all I have to be is who I want to be
I don't wanna take this from
And I'm not afraid to fall
It's not physical or sexual
It's not anything at all
I just love you
I just love you
