The stars say you're my best lover
Matched up like sugar for a cake
They say our love could conquer anything

I'd always hide my feelings
Keep them so cool and so contained
This time it's something I just can't retain

'Cause you give me a good vibe don't you know baby?
You give me funky love, funky love
Could this be what love's all about baby
Or is it just another dream?

Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?

Your voice it calls me everywhere
It haunts my room most every night
This thing has sure enough got me on the line

No chance for explanation
It seems my heart has led the way
Is this my chance to find mon amour porfait

'Cause you give me a good vibe don't you know baby?
You give me funky love, funky love
Could this be what love's all about baby
Or is it just another dream?

Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?

Could be it's just illusion
But I'm feeling something good indeed
Is this where loving starts to mirror my dreams?

'Cause you give me a good vibe don't you know baby?
You give me funky love, funky love

Could this be what love's all about baby
Or is it just another dream?

Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?

Just another dream, just another dream
Just another dream, just another dream

Is this for real or is it just another dream?
Is this for real or is it just another dream?
Is this for real or is it just another dream?
