Like a 454
With the 4 on the floor
Deuce coupe coming at you
Avoiding the capture
Far from stock I'm chopped
And ready to rock
From the city of steel
Catch me crusin down the block
Whenever days are difficult
Im out on my own
Drive an '86 Jetta
Hoping that I could do better
But my car keeps me humble
In the concrete jungle
Despite the wear and tear
It seems to always get me there

Rebuilt the motor because
She decided to blow
And what do you know
Someone stole my stereo, when it's
Time to go I put my foot on the floor
Let the diesel do the work
I ain't complaining no more
Highways and straighaways
Offroads and open roads
No matter where I go
Still be making the show
It's kinda like life
And life treats you good
It's not what's on the outside
It's what's under the hood

[Chorus: 2x]

Put the pedal to the metal and im off and never getting
lost
Which way will I turn when roads cross
Press the petal to the metal little more when it's scary
But one thing for sure, keep my foot on the floor

It doesn't matter what you drive

It's like you drive what you got
Discipline you can win
Just let the tire spin
And begin
The journey of life with each stride
Meet me on the other side
Let me know when you arrive
Sometimes we can live
Be sure that you're insured
Got a back up plan
And in with the program
Who I am, Doesn't reflect material wealth
My vehicle approaches

[Chorus:]

Put the pedal to the metal and im off and never getting
lost
Which way will I turn when roads cross
Press the pedal to the metal little more when it's scary
But one thing for sure, keep my foot on the floor

Won't stop drivin till it's over
Still be cruisin when the sun goes down
Won't stop drivin till it's over
Still be cruisin when the sun goes down

[Chorus: 2x]

Put the pedal to the metal and im off and never getting
lost
Which way will I turn when roads cross
Press the pedal to the metal little more when it's scary
But one thing for sure, keep my foot on the floor

[x2]

Put the pedal to the metal and im off

Pedal to the metal and im off
