Like a 454
With 4 on the floor
dude, crews comin at you
Avoiding the capture
Fall from stop and drop
Then we ready to rock
And city of steel
Catch me crusin down the block
Whenever days are difficult
Im out on my own
Driving 86 Jetta
Hoping that I could do better
But my car keeps me humble
In the concrete jungle
Despite the wear and tear
It seems to always get me there

Rebuilt the motor because
She decided to blow
And what do you know
Someone stole my stereo,
when it's time to go I put my foot on the floor
Let the deasel do the work
I ain't complaining no more
Highways and straighaways
Offroads and open roads
No matter what we will
still be making the show
It's kinda like life
And life treats you good
It's not what's on the outside
It's what's under the hood

Chorus: x2

Put the pedal to the metal and im off aint never getting
lost

Which way will I turn when roads cross

Put the petal to the metal any more and it's scary
But one thing for sure, keep my foot on the floor

It doesn't matter what you drive

It's like you drive what you got
Discipline you can win
Just let the tire spin
And begin
The journey of life with each ride
Can you help me at the side
On what we wanna ride
Sometimes we can live
(something)
With the back up plan
And in with the program
Who I am, Doesn't reflect material
My vehicle approachessss damn

Chorus: x2

Put the pedal to the metal and im off aint never getting
lost
Which way will I turn when roads cross
Put the petal to the metal any more and it's scary
But one thing for sure, keep my foot on the floor

Won't stop drivin till it's over
Still be cruisin when the sun goes down
Won't stop drivin till it's over
Still be cruisin when the sun goes down

Chorus: x2

Put the pedal to the metal and im off aint never getting
lost
Which way will I turn when roads cross
Put the petal to the metal any more and it's scary
But one thing for sure, keep my foot on the floor

x2

Put the pedal to the metal and im off

Pedal to the metal and im off
