Times goes by at such a pace  
It's funny how it's easy to forget her face  
You hide the cracks, the facts will find you  
Turn your back and leave the lonely days behind you  
now

You better put it behind you now  
You better put it behind you now  
Too much to hold on, hold on to  
You better put it behind you now

All the things you took for granted  
Hit you like a bullet in the gut  
You can't get up  
Well are you gonna even try?  
Cos if you never even try  
Time will pass you by

You better put it behind you now  
You better put it behind you now  
Too much to hold on, hold on to (Hold on, hold on to)

You better put it behind you now  
You better put it behind you now  
Too much to hold on, to hold on to (Hold on, hold on to)  
You better do what's best for you

Don't care what she said and (Better put it behind you  
now, better put it behind you now)  
Only in your head (Hold on, hold on to)  
Time will help you out (Better put it behind you now, you  
better put it behind you now)  
Still you don't see her (Hold on, hold on to)

You better put it behind you now  
You better put it behind you now  
Too much to hold on, to hold on to  
You better do what's best for you
