"Come Be With Me"

Visit "[Come Be With Me](#)" on MotoLyrics.com

Baby this life can break your heart
Everyone hurts to some degree
So while this world is falling apart
Why dont you come be with me?

Dont you know that life can be so cold
When you're without the one you need
How much longer do I have to go?
Waiting for you, come be with me

CHORUS

Love can be so simple when you let it flow
Keep it in your head, feel it in your heart
Send it through your soul

Look up at the stars burning bright
Listen to the wind whisper sweet
Heaven and earth know the moment is right
Why dont you come be with me?

CHORUS

Look up at the starts burning bright
Listen to the wind whisper sweet
Heaven and earth know the moment is right
Why dont you come be with me?

Heaven and earth know the moment is right
Why dont you come be with me?
