Baby this life can break your heart  
Everyone hurts to some degree  
So while this world is falling apart  
Why dont you come be with me?

Dont you know that life can be so cold  
When you're without the one you need  
How much longer do I have to go?  
Waiting for you, come be with me

### CHORUS

Love can be so simple when you let it flow  
Keep it in your head, feel it in your heart  
Send it through your soul  
Look up at the stars burning bright  
Listen to the wind whisper sweet  
Heaven and earth know the moment is right  
Why dont you come be with me?

### CHORUS

Look up at the starts burning bright  
Listen to the wind whisper sweet  
Heaven and earth know the moment is right  
Why dont you come be with me?

Heaven and earth know the moment is right  
Why dont you come be with me?
