Greet the Obliterator  
He's here to end your life  
Coldblooded - hardhearted  
His ways are the ways of destruction  
just for the sake of destruction  
Dark grey smoke enshroud the sun  
from countless fires in the distance  
Of fear the ground is trembling  
cries and screams all fill the silence  
Total obliteration is coming this way  
If you believe in gods, it's times to pray  
Feel the warm winds growing warmer  
Sence the smell of sulphur fires  
The earth is in flames - the soil turns black

The manifestation of a failed world  
spring and summer, greet the fall  
...now it's time to end it all  
This is the last day of the human race  
Dies ater -  
...dies illa solvet saeculum in favilla  
Give 'em hell  
Obliterator - Give 'em hell  
(The black day -  
...this day all of mankind shall be burnt to ashes)
