Obese pathetic creature  
Exaggerated, consuming anatomical features  
Years of sloth and unfit diet  
Have created this gastrointestinal nightmare  
Biopsy performed  
1,000 strains of cancer  
Goiters, tumors, rectal decay  
Anally emaciate  
Dire need for colonics  
Advanced restructure now gives way  
Pressurized antibacterial spray  
Excess remains for a dish to sautee  
Inept of happiness  
Incapable of a normal existence  
Ever ingesting abcess  
Malignant offal-cavern of human cess  
Biopsy performed  
1,000 brains no answer  
Superceding our knowledge of anatomy  
With the ferocious virulence of pathology  
All attempts have failed-  
We're losing him  
Last ditch effort for preservation  
The remains are felched or munged  
And spat out into a jar of formaldehyde  
Ever ingesting abcess  
7 years of fecal decay  
Eaten from inside and withered away  
Cauterized rectum of colonic waste  
You are the victim  
And embarrassingly you die  
Exposed blackened innards of digestion  
Closed casket funeral time

Biopsy hypothesis:  
Subject neglected by life  
Superceding our knowledge of anatomy  
With the ferocious virulence of pathology  
Ever ingesting abcess

Malignant offal-cavern of human cess  
Goiters, tumors, rectal decay  
Anally emaciate  
Culinary...  
Scatology...  
Disease....  
On feces I feed  
Dire need for colonics  
Advanced restructure now gives way  
And emptied into the hands of a physician  
A gastro-intestinal plague  
Survives.
