Obese pathetic creature  
Exaggerated, consuming anatomical features  
Years of sloth and unfit diet have created this  
gastrointestinal nightmare  
Biopsy performed  
1,000 strains of cancer  
Goiters, tumors, rectal decay  
Anally emaciate

Dire need for colonics  
Advanced restructure now gives way  
Pressurized antibacterial spray  
Excess remains for a dish to saute  
Inept of happiness and incapable of a normal existence  
Ever ingesting abscess  
Malignant offal-cavern of human cess  
Biopsy performed  
1,000 brains no answer  
Superceding our knowledge of anatomy with the  
ferocious virulence of pathology

All attempts have failed  
We're losing him  
Last ditch effort for preservation  
The remains are felched or munged and spat out into a  
jar of formaldehyde

Ever ingesting abscess  
7 years of fecal decay--eaten from inside and withered  
away--cauterized rectum of colonic waste  
You are the victim and embarrassingly, you die  
Exposed blackened innards of digestion  
Closed casket funeral time

Biopsy hypothesis: subject neglected by life  
Superceding our knowledge of anatomy with the  
ferocious virulence of pathology  
Ever ingesting abscess  
Malignant offal-cavern of human cess  
Goiters, tumors, rectal decay  
Anally emaciate

Culinary...  
Scatology...  
Disease....  
On feces, I feed

Dire need for colonics  
Advanced restructure now gives way and emptied into  
the hands of a physician  
A gastrointestinal plague survives
